OBJECTIVE

Software Engineer with 1 year of experience in building full-stack applications and AI-enabled internal platforms. He has contributed to the design and development of scalable systems, proof-of-concepts, and modernization initiatives, with hands-on exposure to frontend development, backend services, containerized deployments, and cloud-based solutions. He brings a balanced skill set across application development, system design, and emerging Generative AI practices.

EDUCATION

Agni College Of Technology **2021- 2025**

BE.Computer Science And Engineering (Distinction with Honors)
CGPA Score 85.2% (8.52 CGPA)

PS.HR.SEC.SCHOOL -State Board **2020- 2021**

Higher Secondary Second Year (+2)
80% in Higher Secondary Second Year Public Examination

PS.HR.SEC.SCHOOL -State Board **2018- 2019**

SSLC
72% in SSLC Public Examination.

EXPERIANCE

Software Development Engineer (1 Year) **March 2025 - Ongoing**

Squareshift technologies pvt ltd. - Chennai, India

- Developed full-stack applications using React.js and modern backend technologies.
- Designed and optimized databases including PostgreSQL, MySOL and MongoDB using advanced SQL practices.
- Built and deployed scalable cloud-native solutions on Google Cloud (Cloud Run, Cloud SQL, BigQuery, Cloud Storage).
- Implemented data workflows using Apache Airflow and Dataform for reliable data processing.
- Worked with AI platforms including Vertex AI, Claude, Cursor, and Antigravity to build intelligent and automated solutions.

SKILLS

Technical Skills:

- **Frontend :** UI Designing, HTML, CSS, JavaScript, React JS
- **Backend** : Python, Express JS
- **Databases** : SQL, Postgres, Mongo DB
- **Google Cloud** : Cloud RUN, Cloud SQL, Cloud Storages, Bigquery
- **Others** : Docker, Git & Github, Apache Airflow, Figma, Canva

Soft Skills:

- Leadership • Quick learner • Time Management • Punctuality

LANGUAGES

- Tamil - R, W & S
- English - R, W & S

PROJECTS

Employee Management System

- Designed and developed an internal Employee Management System for SquareShift, building the application end-to-end to manage employee records, roles, and organizational data.
- Implemented core workflows for employee lifecycle management with a focus on clean user flow, data consistency, and maintainability, supporting internal operations and future feature expansion.

User Journey Builder (AI-Powered Project Management & UI Generation Platform)

- Designed and specified an end-to-end AI-assisted product development platform that guides users through the complete software delivery journey—from project creation and document ingestion to persona modeling, epic decomposition, user story generation, MVP backlog prioritization, and automated UI generation with production-ready code outputs.

PM automation System

- Built a full-stack AI-powered meeting intelligence platform using Python (FastAPI) and React (Vite). The system leverages Google Gemini AI to automatically process meeting transcripts, generate executive summaries (key decisions, blockers, risks, stakeholder engagement), extract prioritized action items, and send personalized follow-up emails via Gmail API. Integrated with Google Drive, and PostgreSQL (Cloud SQL), and deployed on Google Cloud Run.

Tableau to Looker migration project

- Contributed to a real-time Tableau to Looker migration software application project, which automate the process of transforming Tableau dashboards into optimized LookML model, view, and dashboard files.

Jira Chatbot Assistant using Vertex AI

- Built an intelligent chatbot integrated with Google Vertex AI and Jira REST APIs to dynamically fetch and respond to project-related queries like project status, member details, and assigned tasks.

LLM Observability Platform

- Designed and implemented an end-to-end LLM observability and safety monitoring pipeline using Elastic Cloud, enabling real-time analysis of user prompts for sentiment, hate speech, bias, and sensitive information before and after LLM inference.

CERTIFICATIONS

Google Cloud Certified :

- Professional Data Engineer

Anthropic :

- Claude Code in Action

Infosys Springboard:

- Java Object Oriented Programmings Concept
- Python programming Fundamentals
- HTML Concepts

Great Learning :

- Fundamentals of C Programming
- UI / UX Concepts for beginners

Free Code Camp :

- Responsive Web Designing
